Success stories

Customer: Rosario Municipality
Project: SIAT
SIAT (Integrated Tax Administration System) is designed and developed to allow tax administration processes in the public sphere, under free license.

Customer: Credicoop Bank
Project: GCA
GCA (Associates Contact Management) is the Credicoop Bank CRM system based on SuiteCRM. The client's central need was to implement a CRM solution that interacts with their central data systems (without saving business information in the application databases) through the integration with various webservices, telephone and campaign systems and security schemes.

Customer: Citibank
Project: Banca Ne
The project consists of a two-stage migration of the current home banking used by Banamex Bank (Mexico) to a new Java-based platform used by Citibank.
